Re: B.P. Minerals
Barney's Canyon Project
Truck Wash Approval

Dear Mr. Ramsey:

We have received the revised and additional information submitted for the Barney's Canyon truck wash facility. Based on our review of the information, it is hereby approved subject to the following conditions:

1. The truck wash winter time, liquid draw down and sediment disposal operational procedures shall be included in detail in the operation and maintenance manual which shall be approved by the Bureau of Water Pollution Control
2. The truck wash is approved only as a total containment facility with water being used for dust control or disposal on a waste dump or a coarse ore stockpile. It is understood that wastewater will not be allowed to pollute waters of the State.
3. That the operation and maintenance manual will contain detailed instructions for removal of ice from the truck wash pond so the bottom will not be damaged.
4. These facilities shall be used only for the removal of sediments from the body of the vehicles and shall not be used for steam cleaning of engines or draining of any automotive fluids.

The truck wash consists of a 40-foot by 60-foot sloping concrete pad which collects sediments, and a 50-foot by 20-foot by 4-foot deep containment pond to hold the liquid until it is removed by pumping for disposal for dust control or on the coarse ore stockpile or waste pile.

Mr. R.J. Ramsey
